Earthquake Insurance

WE CAN REDUCE YOUR EARTHQUAKE INSURANCE PREMIUMS

As an "Earthquake Specialist", I would like to offer you an opportunity to compare our earthquake policies with your current coverage. We can offer you a lot better coverage and reduce your premiums if you currently have earthquake coverage and your homeowner's insurance is with either State Farm, Allstate, Farmers, CSAA, or any of the other insurance companies that offer earthquake insurance through the California Earthquake Authority (CEA). If you don't currently have earthquake insurance because you thought it was too expensive, let me send you a quote. You will be pleasantly surprised.

TWO TYPES OF EARTHQUAKE POLICIES AVAILABLE

Comprehensive Earthquake Policy. This is GeoVera's preferred policy. It allows you to use any amount of your total earthquake coverage toward the repair or replacement of your dwelling, separate structures, personal property, or additional living expenses. There is not another stand-alone earthquake policy on the market like it.

Standard Earthquake Policy. This is the exact same type of policy as the California Earthquake Authority (CEA), except, as indicated above, I can offer you more dwelling coverage at a better premium.

THE COMPANY

The company offering these tremendous policies is GeoVera Insurance Co. They are a subsidiary of and 100% reinsured by the St. Paul Companies, the eighth largest insurance company in the United States. More importantly to you, GeoVera is both "A" rated and "Admitted" in California.

To get a quote on either one of these earthquake policies, simply fill out the questionnaire on the back side of this form, and either fax or send it to me. I will mail my proposals to you the day I receive them. You will like the results.
